

Object Detection Codes

This document lists out the whole codes for object detection in case there comes a need to setup new environment to perform detections

Setting up kernel -

Open the **command prompt**

Inside the terminal, type **cd TeamMindHawks**

Inside **TeamMindHawks** folder

pip install virtualenv

python -m venv OD

.\OD\Scripts\activate

python -m pip install --upgrade pip

pip install ipykernel

python -m ipykernel install --user --name=yolo

pip install jupyterlab

Opening jupyter notebook -

jupyter notebook

Performing Detections -

Follow the Object detection video link provided in this link for the whole detection process
